Indiana EMS Commission Data Registry
NEMSIS Reporting System

1. **Authority:**

   A. Indiana statute prescribes the authority to collect data for review by the Indiana EMS Commission.

   B. IC 16-31-2-11 states: *"The commission shall develop procedures for ongoing review..... The commission may review any pre-hospital... report record regarding an emergency patient.... However, those records shall remain confidential and may be used solely for the purpose of compiling data and statistics."*

   C. 836 IAC 1-2-3 states*: "All ambulance service providers shall participate...Collecting all data elements prescribed...Reporting that information according to procedures and schedules prescribed by the commission."*

2. **Purpose:**

   A. The EMS Commission's "ongoing review" is designed to evaluate EMS systems in Indiana. This is accomplished by "compiling data and statistics". The collection of run data enables the commission to evaluate each component of the EMS system.

   B. Through database linking software program, crash reports, EMS run and ED hospital data are linked to determine type of vehicle crash, injuries, treatments, and cost outcomes. This data linkage will allow opportunities to influence Indiana citizens' lives through Awareness and Prevention Programs, Driver's Safety Programs, and roadway safety.

3. **NEMSIS Data Elements:**

   A. The Indiana EMS Commission has adopted the National EMS Information System (NEMSIS) and 103 of the 400+ NEMSIS data elements that would collect at a minimum the "essential data elements" to serve as a completed EMS run for a data registry entry. Eight-five (85) Silver elements and an additional eighteen (18) Indiana specific NEMSIS data elements. See Attachment 1.

   B. The NEMSIS program is set for accepting a variety of runs such as cancelled runs, no patient runs, patient refused treatment runs, patient used other transportation runs, and patient transported by EMS.

C. There are two national software certification classes:

    (1) Gold, all NEMSIS data points (400 +).

    (2) Silver, the minimum of the 85 required NEMSIS basic data points.

4. **<u>Reporting:</u>**

The EMS Commission launched a project that has defined the *"essential data elements"* needed to collect and report to the EMS Registry. The commission's directive about developing reporting methods was to encompass every Certified EMS Provider in the state. The commission approved the following two methods of reporting data to the EMS Registry via the NEMSIS data code set. All BLS Non-Transport providers are requested to download their monthly EMS run data to the State Fire Marshall NFIRS Program.

    A. <u>State Software:</u>

        (1) The state EMS office contracted with a software vendor that is NEMSIS Gold compliant and certified by the University of Utah, the NEMSIS development center.

        (2) Indiana EMS providers are to use the 85 required elements, "Silver compliant", plus 18 NEMSIS data elements required by the Indiana EMS Commission. One hundred and three (103) NEMSIS data points are the Indiana Data Registry minimum "essential data elements". (See Appendix 1.)

        (3) The state software program allows EMS providers to collect their data for reporting to the EMS Data Registry and to evaluate their own individual system by using the report writing program capabilities.

        (4) The state software also allows users to use more data elements beyond the 103 data points for their own in-house EMS run tracking and statistical reporting.

        (5) The providers are responsible to transfer their information monthly to the EMS Data Registry by the 15th of the following month in the NEMSIS XML format.

        (6) Data transfers will be in electronic format either by diskette, CD, downloads as attachments to e-mails or by on-line using the state web server.

B. **Independent Software:**

(1) Indiana EMS providers may choose to collect the "essential data elements" prescribed by the Indiana EMS Commission on a private vendor software program that is NEMSIS compliant.

(2) Those Indiana EMS providers are to use 103 of the 400+ NEMSIS data elements that would collect at a minimum the "essential data elements". See Attachment 1.

(3) The providers are responsible to transfer their information to the EMS Data Registry by the 15th of the following month in the NEMSIS XML format.

(4) Data transfers will be in electronic format either by diskette, CD, or by downloads as attachments to e-mails.

(5) The data dictionary and transfer specs are available to accomplish that transfer. Please contact the EMS Data Registry Program Manager at (317) 233-4283.

C. **EMS Run Data Elements:**

(1) The following types of EMS runs are to be reported to the EMS Data Registry:

    (a)   Cancelled
    (b)   No Patient Found / Gone on Arrival
    (c)   Patient Refused Care
    (d)   Patient Treated, Transferred Care
    (e)   Patient Treated, Transported by Law Enforcement
    (f)   Dead at Scene
    (g)   No Treatment Required
    (h)   Treated and Released
    (i)   Treated, Transported by EMS to ED or Urgent Care Center
    (j)   Treated, Transported by EMS from one ED or Urgent Care Center to another ED or Urgent Care Center
    (k)   Treated, Transported by Private Vehicle

(2) The following types of EMS runs are not to be reported to the EMS Data Registry:

    (a)   Transports to doctor's office or an outpatient care center
    (b)   Transports to a rehabilitation facility
    (c)   Transports to a nursing home, or skilled nursing or extended care facilities
    (d)   Transports to industrial or hospital clinics
    (e)   Transports to a private residence

5. **Reporting Implementation**

    A. The Indiana EMS Data Registry will phase implementation for the NEMSIS data set. Starting in January 2009, a six-month implementation period will be used to ease the transition to the new NEMSIS data set.

    B. Users of third-party software may continue to use the original data set until their software is ready to upgrade to NEMSIS. (See the IN DHS / EMS website Private Vendor Software List.)

    C. The long-range goal is to have all private vendors with Indiana EMS Provider customers become NEMSIS certified and using the Indiana NEMSIS data set (103 elements).

    D. The Indiana EMS Data Registry, in January 2009, will start the EMS and NFIRS (fire incident reports) on-line, web-based data entry system using the NEMSIS data set.

    E. All BLS Non-Transport providers are requested to download their monthly EMS run data to the State Mire Marshall NFIRS program.

Indiana Data Registry
NEMSIS Certification Instructions
for
Private Vendor Software Companies
with Indiana EMS Customers

1. **Authority:**

   The Indiana EMS Commission and Indiana statute prescribes the NEMSIS data element XML format for Indiana EMS Provider EMS data run monthly reporting. See Indiana NEMSIS Reporting System, page 1, A through C.

2. **Purpose:**

   A. To ensure all private software vendor companies are nationally NEMSIS certified as either Gold or Silver compliant by the University of Utah NEMSIS Program Center.

   B. The seamless transfer of Indiana EMS Provider data runs to the Indiana EMS Data Registry using the standard NEMSIS XML format.

3. **State Testing Format:**

   Starting in January 2009, all private vendor software companies must submit the following for state NEMSIS certification:

   A. Each vendor must submit a test batch file of ten (10) runs in the NEMSIS XML format using the 103 Indiana NEMSIS elements. See Appendixes 1 through 6.

   B. The runs should include at least one of the following types of emergency runs:

      (1)   Cancelled
      (2)   No patient
      (3)   Patient refused treatment
      (4)   Patient treated but not transported by EMS service.
      (5)   Patient treated and transported by EMS service.

   C. Once the private vendor software is Indiana NEMSIS certified, the vendor's Indiana EMS customers may begin downloading their data to the state data registry.

4. **State Contact:**

Please contact the Indiana EMS Data Registry if you have questions about the process:

Mark Nelson
EMS Data Registry Program Manager at (317) 233-4283.

or write to: IN DHS/EMS Data Registry Program Manager
                   302 W. Washington Street, Room E-239
                   Indianapolis IN 46204-2722

or e-mail to: mnelson@dhs.in.gov

Appendix 1

Indiana NEMSIS Data Element List

NEMSIS Demographic Dataset (From D01 – D09):

1. EMS Agency Number.
2. EMS Agency State.
3. EMS Agency County.
4. Level of Service (e.g. Paramedic, ALS, BLS, etc.).
5. Organizational type (e.g. county, hospital, fire department. etc.).
6. Organization Status (e.g. volunteer, paid, combination).
7. Statistical Year (current calendar year).
8. Total Service Area (in square miles).
9. Total Service Area Population.
10. 911 Call Volume per Year.
11. EMS Dispatch Volume per Year.
12. EMS Transport per Year.
13. EMS Patient Contact Volume per Year.
14. EMS Agency Time Zone.
15. National Provider Identifier (assigned by The National Plan & Provider Enumeration Sys).
16. Agency Contact Zip Code.

NEMSIS EMS Dataset (From E00 – E23):

17. Patient Care Report Number.
18. Software Creator (i.e. company name).
19. Software Name.
20. Software Version.
21. EMS Agency Number (in patient record field).
22. Incident Number.
23. EMS Unit (Vehicle) Response Number (i.e. vehicle number)
24. Type of Service Requested.
25. Primary Role of the Unit.
26. Type of Dispatch Delay.
27. Type of Response Delay.
28. Type of Scene Delay.
29. Type of Transport Delay.
30. Type of Turn-Around Delay.
31. EMS Unit Call Sign (i.e. radio number).
32. Response Mode to Scene.
33. Complaint Reported by Dispatch.

34. EMD Performed.
35. EMD Card Number.
36. Crew Member ID (Commission certification number).
37. Incident on Onset Date/Time (i.e. the date/time the injury occurred, or the symptoms, or problem started).
38. PSAP Call Date/Time (e.g. when call came into 911).
39. Unit Notified by Dispatch Date/Time.
40. Unit Enroute Date/Time.
41. Unit Arrived on Scene Date/Time.
42. Unit Arrived at Patient Date/Time.
43. Unit Left Scene Date/Time.
44. Patient Arrived at Destination Date/Time.
45. Unit Back in Service Date/Time.
46. Unit Cancelled Date/Time.
47. Unit Back at Home Location Date/Time.
48. Patient Last Name.
49. Patient's Home Zip Code.
50. Gender.
51. Race.
52. Ethnicity.
53. Age.
54. Age Units (e.g. hours, days, months, years).
55. Date of Birth (MMDDYYYY)
56. Primary Method of Payment.
57. CMS Service Level. (Medicare Service Level)
58. Condition Code Number.
59. Number of Patients at Scene.
60. Mass Casualty Incident (yes or no).
61. Incident Location Type (e.g. work, residence, retail establishment).
62. Scene Zone Number (Indiana Homeland Security District number).
63. Incident County.
64. Incident State of Indiana.
65. Incident Zip Code.
66. Prior Aid (i.e. aid rendered prior to arrival of unit).
67. Prior Aid Performed by.
68. Outcome of Prior Aid.
69. Possible injury.
70. Chief Complaint.
71. Chief Complaint Anatomic Location.
72. Chief Complaint Organ System.
73. Primary Symptom.
74. Other Associated Symptoms.
75. Providers Primary Impression.
76. Providers Secondary Impression.

77. Cause of Injury.
78. Intent of the injury (e.g. self-inflicted)
79. Mechanism of injury.
80. Use of Occupant Safety Equipment.
81. Cardiac Arrest.
82. Cardiac Arrest Etiology.
83. Resuscitation Attempted.
84. Barriers to Patient Care.
85. Medical/Surgical History.
86. Alcohol/Drug Use Indicators.
87. Medication Given.
88. Procedure.
89. Number of Procedure Attempts.
90. Procedure Successful.
91. Procedure Complication
92. Destination/Transferred To, Name.
93. Destination/Transferred To, Code.
94. Destination Zip Code.
95. Destination Zone Code (Indiana Homeland Security District number).
96. Incident/Patient Disposition.
97. Transport Mode from Scene.
98. Reason for Choosing Destination.
99. Type of Destination.
100. Emergency Department Disposition.
101. Hospital Disposition.
102. Research Survey Field.
103. Medication Complication

NEMSIS ID	NEMSIS Definition
D01	The state-assigned provider number of the responding agency
D01	The state in which the Agency provides services
D01	The county(s) for which the agency formally provides service
D01	The highest credentialed personnel's level of service which the agency provides for every EMS encounter if requested. In a tiered response system, this is the highest level of service which could be sent to any specific call.
D01	The organizational structure from which EMS services are delivered (fire, hospital, county, etc.)
D01	The primary organizational status of the agency. The definition of Volunteer or Non-Volunteer is based on state or local terms.
D01	The year to which the information pertains
D01	The total square miles in the agency's service area
D01	The total population in the agency's service area based on year 2000 census data (if possible). This number does not include population changes associated with daily work flow or seasonal movements
D01	The number of 911 EMS calls for the calendar year
D01	The number of EMS dispatches for the calendar year
D01	The number of EMS transports for the calendar year
D01	The number of EMS patient contacts for that calendar year
D01	The time zone for the EMS Agency
D01	**The National Provider Identifier associated with National Provider System (NPS) and used in all standard HIPAA transactions such as electronic claim filing.**
D02	The ZIP code of the Agency contact's mailing address.
E01	The unique number automatically assigned by the EMS agency for each patient care report (PCR). This is a unique number to the EMS agency for all of time.
E01	The name of the software vendor by whom the data collection software was developed
E01	The name of the software package with which the data was collected by the agency
E01	The version of the software used by the agency to collect the data
E02	The state-assigned provider number of the responding agency
E02	The incident number assigned by the 911 Dispatch System
E02	The internal EMS response number which is unique for each EMS unit's (vehicles) response to an incident within an agency.
E02	The type of service or category of service requested of the EMS service responding for this specific EMS incident.
E02	The primary role of the EMS service which was requested for this specific EMS incident.
E02	The dispatch delays, if any, associated with the dispatch of the EMS unit to the patient encounter
E02	The response delays, if any, of the unit associated with the patient encounter
E02	The scene delays, if any, of the unit associated with the patient encounter
E02	The transport delays, if any, of the unit associated with the patient encounter
E02	The turn-around delays, if any, associated with the EMS unit associated with the patient encounter
E02	The EMS unit number used to dispatch and communicate with the unit. This may be the same as the EMS Unit/Vehicle Number in many agencies.
E02	Indication whether or not lights and/or sirens were used on the vehicle on the way to the scene
E03	The complaint dispatch reported to the responding unit.
E03	Indication of whether EMD was performed for this EMS event.
E03	The EMD card number reported by dispatch, consisting of the card number, dispatch level, and dispatch mode
E04	The State Certification/Licensure ID number assigned to the crew member
E05	The date/time the injury occurred, or the date/time the symptoms or problem started
E05	The date/time the phone rings (911 call to public safety answering point or other designated entity) requesting EMS services.
E05	The date the responding unit was notified by dispatch
E05	The date/time the unit responded; that is, the time the vehicle started moving
E05	The date/time the responding unit arrived on the scene; that is, the time the vehicle stopped moving
E05	The date/time the responding unit arrived at the patient's side

E05	The date/time the responding unit left the scene (started moving)
E05	The date/time the responding unit arrived with the patient at the destination or transfer point
E05	The date/time the unit back was back in service and available for response (finished with call, but not necessarily back in home location)
E05	The date/time if the unit's call was cancelled
E05	The date/time the responding unit was back in their service area. In agencies who utilized Agency Status Management, home location means the service area as assigned through the agency status management protocol.
E06	The patient's last (family) name
E06	The patient's home ZIP code of residence
E06	The patient's gender
E06	The patient's race as defined by the OMB (US Office of Management and Budget)
E06	The patient's ethnicity as defined by the OMB (US Office of Management and Budget)
E06	The patient's age (either calculated from date of birth or best approximation)
E06	The units which the age is documented in (Hours, Days, Months, Years)
E06	The patient's date of birth
E07	The primary method of payment or type of insurance associated with this EMS encounter
E07	The CMS service level for this EMS encounter.
E07	The condition codes are used to better describe the service and patient care delivery by an EMS service. Please consult CMS documentation for detailed descriptions of these condition codes and their use.
E08	Indicator of how many total patients were at the scene
E08	Indicator if this event would be considered a mass casualty incident (overwhelmed existing EMS resources)
E08	The kind of location where the incident happened
E08	Geographic zone representing the location of the scene
E08	The county or parish where the patient was found or to which the unit responded (or best approximation)
E08	The state, territory, or province where the patient was found or to which the unit responded (or best approximation)
E08	The ZIP code of the incident location
E09	Any care which was provided to the patient prior to the arrival of this unit.
E09	The type of individual who performed the care prior to the arrival of this unit.
E09	What was the outcome or result of the care performed prior to the arrival of the unit?
E09	Indicates that the reason for the EMS encounter was related to an injury or traumatic event. This data element provides documentation to classify the EMS Reason for Encounter as either injury or non-injury related based on mechanism and not on actual injury
E09	The statement of the problem by the patient or the history provider in one or two words
E09	The primary anatomic location of the chief complaint as identified by EMS personnel
E09	The primary organ system of the patient injured or medically affected. This is to be completed by EMS personnel with a minimum of an EMT-Paramedic level of credentialing.
E09	The primary sign and symptom present in the patient or observed by EMS personnel
E09	Other symptoms identified by the patient or observed by EMS personnel
E09	The EMS personnel's impression of the patient's primary problem or most significant condition which led to the management given to the patient (treatments, medications, or procedures).
E09	The EMS personnel's impression of the patient's secondary problem or which led to the management given to the patient (treatments, medications, or procedures).
E10	The category of the reported/suspected external cause of the injury
E10	The intent of the individual inflicting the injury
E10	The mechanism of the event which caused the injury.
E10	Safety equipment in use by the patient at the time of the injury
E11	Indication of the presence of a cardiac arrest at any time associated with the EMS evert.
E11	Indication of the etiology or cause of the cardiac arrest (classified as cardiac, non-cardiac, etc.)
E11	Indication of an attempt to resuscitate the patient who is in cardiac arrest (attempted, not attempted due to DNR, etc.)
E12	Indication of whether or not there were any patient specific barriers to serving the patient at the scene
E12	The patient's pre-existing medical and surgery history of the patient
E12	Indicators for the potential use of Alcohol or Drugs by the patient.

E18	The medication given to the patient
E18	Any complication (abnormal effect on the patient) associated with the administration of the medication to the patient by EMS
E19	The procedure performed on the patient.
E19	The number of attempts taken to complete a procedure or intervention regardless of success
E19	Indication of whether or not the procedure performed on the patient was successful
E19	Any complication associated with the performance of the procedure on the patient
E20	The destination the patient was delivered or transferred to
E20	The code of the destination the patient was delivered or transferred to, if present and available
E20	The destination zip code in which the patient was delivered or transferred to
E20	The zone number of the destination the patient was delivered or transferred to
E20	Type of disposition treatment and/or transport of the patient.
E20	Indication whether or not lights and/or sirens were used on the vehicle while leaving scene
E20	The reason the unit chose to deliver or transfer the patient to the destination
E20	The type of destination the patient was delivered or transferred to
E22	The known disposition of the patient from the Emergency Department (ED)
E22	Indication of how the patient was dispositioned from the hospital, if admitted.
E23	A customizable field to be used by local agencies for additional documentation or research.

National Highway Transportation Safety Administration (NHTSA)

NHTSA Uniform Pre-Hospital EMS Dataset Version 2.2

National EMS Information Agency Project (NEMSIS)

www.nemsis.org

In 1994, Version 1 of the National Highway Traffic Safety Administration's Uniform Pre-Hospital EMS Dataset was created through a consensus based national data conference. The NHTSA Version 1 EMS dataset has been acknowledged as the national standard for the EMS industry. The Version 2.2 dataset was also created through a national consensus process to update and revise this standard.

The NHTSA EMS Uniform Pre-Hospital Dataset, Version 2.2 is composed of three separate components. A Demographic Dataset provides a standardized set of definitions describing an EMS System. An EMS Dataset provides a standardized set of definitions describing an EMS event. The third component of the Version 2.2 standard is an XML format and definition created to promote the movement of the Version 2.2 data elements between data systems.

Any implementation of the NHTSA Version 2.2 dataset must include the use of the Demographic dataset, EMS dataset, and XML standard. This document provides over 400 definitions which can be implemented by an EMS system. The National EMS Information System Initiative (NEMSIS) serves to provide technical assistance for the implementation of the dataset. National data elements are defined which should be collected by a National EMS Database but additional data elements should be considered for use at the state and local levels depending on each state or local EMS systems need. The goal of NEMSIS is to establish an EMS data system at the local, state, and national levels. Please see www.nemsis.org for more information.

Information provided in this document includes the following:
* Name of the Data Element
* Definition of the Data Element
* Data Type of the Data Element (many data elements have comments provided to assist in the implementation of a database schema and the NHTSA Version 2 XML standard)
* How to deal with missing or incomplete information (See Missing Data or Null Values below)
* The Variables associated with each Data Element
* What Data Elements are associated with the Data Element (for example Date/Time Medication Administered is associated with each Medication Given Data Element)
* Whether the Data Element is part of the Data Elements to be collected in the National EMS Database (NDB)
* Whether the Data Element is part of the medical record information (Patient Care Report) or is a quality management Data Element to be used internally by the EMS system and protected by Peer Review.
* What Reports are possible through the use of the Data Element
* Who is responsible for collecting the Data Element
* How the Data Element is related to other National Data Tools such as NHTSA Version 1, NFIRS, and Utstein.
